

Case Study

CompuCal allows Carlsberg's Northampton Brewery to streamline all of their calibration management into one easy to use system

The company provides tailored calibration management and instrumentation sales solutions to clients across Medical Device, Pharmaceutical, Food, Dairy and Beverage, Manufacturing and Retail sectors. CalX is also the largest fuel verification service provider on the island of Ireland.

Carlsberg UK is a wholly owned subsidiary of the Carlsberg Group and is the UK's fourth largest brewer employing over 1,800 people across the business. All manufacturing carried out by Carlsberg UK occurs at our Northampton Brewery site, producing some of the UK's best known and most loved beer brands including Carlsberg, Carlsberg Export, Carlsberg Special Brew, Carlsberg Citrus and the latest addition to the Carlsberg portfolio, Carlsberg 0.0%. Carlsberg UK also produces Somersby Cider, Tuborg and San Miguel.

Currently the only Carlsberg UK site using the CompuCal system is the Northampton Brewery. Carlsberg's previous system was very manual, difficult to manage and complex to administrate, while preparing for audits became extremely time-consuming. Now using CompuCal they know that everything is easily accessible from a single location. All calibration records are held in a single database and are always ready for an audit. CompuCal provide a value for money turnkey solution helping clients to understand the system, and provide the expertise to import data into the correct fields.

“Using CompuCal allows us to streamline all of our calibration management into one easy to use system. We have been able to very quickly improve efficiency, reduce administration time and move to a paperless solution”.

The Carlsberg plant manages over 600 critical instruments and are adding to this as the system grows. The license currently caters for 2 concurrent users and this can be scaled up as required. There are close to 40 users set up in the system and 2 can access in the same session.

Key benefits:

Moving to CompuCal allowed us to easily automate our processes and work in a much more efficient way. Our previous systems were disconnected, very manual and very time consuming to manage.

CompuCal allows us to have full visibility of all of our instrumentation in a single easy to use system.

- Improved efficiency
- Accessibility from anywhere
- Reports and KPI's updated on the fly and easily accessible
- Single easy to use system giving full visibility of all instrumentation work
- A move to a paperless solution
- Standardized our processes
- Reduced time for data entry
- Eliminated manual data entry errors
- Automated planning and scheduling
- Automated deviation management and email alerts
- Installed confidence that we are always prepared audit's
- Reduced time to prepare for audits
- Manages full traceability of all historical records
- Manages references and full reverse traceability for reference used
